

Get summer gig-ready

A simple pre-gig checklist for protecting your instruments on the road, backstage and on stage. Before you head out, it's worth taking a few minutes to check:

Packing & travel

Have you packed everything you need for the gig?

Are instruments and equipment in suitable, clearly labelled cases?

Have you added useful spares, such as strings, reeds, cables, batteries, bows, sticks or accessories?

How will your instruments and equipment be stored while travelling?

Have you allowed enough time for traffic, parking, unloading and setting up?

Venue & stage

Who will keep watch during load-in and pack-down?

Where will cases, bags and spare equipment be stored while you are playing?

Does the stage or performance area have shade or rain cover?

Is there enough space between the audience and performance area?

Instrument & gear cover

Do you have suitable insurance to cover your gear while you're out of the house, travelling and gigging?
